CAREER OBJECTIVE

Seeking employment with a company where I can use my talents and skills to grow the company.

SKILLS

HTML

CSS

Bootstrap

JavaScript

Angular js

Java

PROJECTS

Project Name: Profilo

Project Detail	Profilo Designed and developed a personal portfolio website showcasing my skills, achievements, and projects. Created a responsive and visually appealing user interface using HTML and CSS. Included sections for an about me, my work, skills, and contact information. This project served as an online hub to present my qualifications and share my work with potential employers and collaborators.

Project Name: To-Do AppList

Project Detail	To-Do AppList Build a simple to-do list application that allows users to add, edit, and delete tasks. You can use HTML, CSS, and JavaScript for the front-end and store the tasks in local storage https://ram2515.github.io/To-Do-AppList/

Project Name: Calculator

Project Detail	Calculator To create a basic calculator using CSS, HTML, and JavaScript, you'll need to implement an interactive interface with buttons for addition, subtraction, multiplication, and division operations. The calculator should have a display screen to show user input and results. Utilize CSS grid system for button alignments. Use event listeners, if-else statements, operators, and loops to handle user input and perform calculations. This project requires some skill but can be done with basic knowledge of these technologies. https://ram2515.github.io/calculator/

Project Name: Ecommerce-Website-Footware

Project Detail	Designed and developed a responsive e-commerce website from scratch using HTML, CSS, and JavaScript. Implemented key features, such as a user-friendly product catalog, shopping cart, and secure checkout process. Enhanced the user experience with dynamic content loading and interactive elements, contributing to a seamless shopping experience. This project showcased my proficiency in front-end web development and my ability to create engaging, customer-oriented web applications. https://ram2515.github.io/Ecommerce-Website-Footware/

Project Name: Amazon-Clone

Project Detail	Developed a functional Amazon clone using HTML and CSS to replicate the core user interface and design elements of the popular e-commerce platform. Implemented features such as a navigation bar, product listings, and a responsive layout. This project honed my skills in front-end web development, CSS styling, and user interface design. https://ram2515.github.io/Amazon-Clone/
